

FOR IMMEDIATE RELEASE

Altova Releases Spanish Language Versions of XMLSpy, MapForce, and StyleVision

Localized versions provide Spanish-speaking customers with powerful tools for working with XML, databases, and UML in their native language.

BEVERLY, Mass., April 25, 2012 – Altova® (<http://www.altova.com>), creator of XMLSpy®, the industry leading [XML editor](#), today announced that XMLSpy, MapForce® and StyleVision® Version 2012 Release 2 (v2012r2) are now available in fully translated Spanish language versions. The products in Altova's all-new Spanish v2012r2 product line have been completely localized, enabling users to take advantage of the same powerful functionality available in its English, German, and Japanese language versions.

“As part of our on-going effort to meet the needs for our global customer base by providing fully localized software, documentation, and Web site materials, we are proudly releasing XMLSpy, StyleVision, and MapForce, as well as our Web site, in a fourth language,” said Alexander Falk, President & CEO at Altova. “Following the success of our other localized versions, we are very pleased to now also provide this option to our Spanish speaking customers.”

The new Spanish language editions are available at the same cost as the English versions, and current users can unlock any language version using their existing key code.

Altova XMLSpy is the industry's best-selling XML editor and development environment for modeling, editing, transforming, and debugging XML-related technologies. With support for XML Schema, XSLT, XQuery, Open XML, XBRL, relational databases, and more, XMLSpy is the must-have tool for working with XML.

Altova MapForce is an award-winning any-to-any graphical data mapping, conversion, and integration tool that maps data between any combination of XML, database, flat file, EDI, Excel 2007+, XBRL, and/or Web service, then transforms data instantly or autogenerates royalty-free data integration code for the execution of recurrent conversions.

Altova StyleVision is an award-winning stylesheet design tool for generating reports and electronic forms from a wide variety of source formats. StyleVision provides advanced support for transforming XML, XBRL, and database content into HTML, RTF, PDF, Word 2007+, and Authentic® eForms, enabling the design of professional decision support resources with powerful visualization features such as dynamic data, modular templates, charts, and more.
